# African Teacher Education OER Network (ATEN): August 2012

### **Background**

In Teacher Education, OER Africa has built a committed and mutually rewarding relationship with TESSA, the Teacher Education in Sub-Saharan Africa project, culminating in the establishment, in 2010, of the African Teacher Education OER Network (ATEN). The goal of the African Teacher Education OER Network is to assist African teacher educators to inform and influence policy in their own institutions in respect to OER, and share expertise, experience and resources to improve teacher education in local contexts. In collaboration with TESSA, an important achievement in 2011 was the stimulation of inter-institutional conversation about OER through the successful Pre-Conference Workshop attached to the Distance Education and Teacher Training in Africa (DETA) 2011 Conference in Maputo. Secondly, the OER Africa Teacher Education Space was launched on our website, which organizes OER under themes (initially Education Studies, Mathematics, and School Leadership). Most of these OER are being actively used by a variety of teacher education institutions both within Africa and elsewhere (some of the School Leadership materials are also being used in the Pacific region for example). Thirdly, we are working with the National In-Service College of Open Learning in Zambia (NISTCOL - currently in the process of transformation into Chalimbana University [of Education]) on OER creation and integration into distance teacher education programs as well as with the University of Dar es Salaam and their two affiliated Colleges of Education, Mkwawa and Dar-es-Salaam, on e-Learning materials development integrating OER and multimedia. At the same time, we are facilitating collaboration between oer4schools (a project of the University of Cambridge) and Unisa to integrate technology into their science and mathematics education programmes in ways that are informed by a pedagogic concern for increased learner engagement and interaction.

## **Recent developments**

In the first and last weeks of March 2012, OER Africa co-facilitated workshops for UDSM at Mkwawa University College of Education in Iringa, Tanzania and for Chalimbana University (formerly NISTCOL) in Chalimbana, Zambia. These workshops resulted in updated action plans as attached in Appendices 1 and 2. Also in the last week of March, we participated in a workshop at Unisa to explore the possibility of collaboration between the newly formed Unisa College of Education (CEDU) and the Centre for Commonwealth Education oer4schools project at the University of Cambridge. This resulted in the draft ideas attached in Appendix 3.

In addition, we facilitated with TESSA and University of Cape Coast, preparations for a preconference workshop in Ghana, as a precursor to the 56<sup>th</sup> ICET conference, that, among other things, sought to establish the interest groups that we see forming the core of ATEN work in the next period viz. Early Childhood Development (ECD), Mathematics Education, Science Education and School

Leadership. We aim to update the ATEN webpages to reflect these interest groups and to support interaction among interest group members.

#### Other initiatives:

The African Council for Distance Education (ACDE) has expressed interest in the possibility of identifying centres to support teacher educators to use ODL approaches in their teacher education work.

Preparations are underway for the DETA 2013 conference in Nairobi and we will be consulting on the design and facilitation of another pre-conference workshop on OER for teacher education.

OER Africa is supporting UEW with the migration of resources they plan to share to an OCW site.

Preparations are underway to share teacher education materials developed by the University of Fort Hare for its BPrimEd programme.

Watch this space for developments in all these areas!

# **Appendix 1: Revised workplan for UDSM-MUCE-DUCE**

| What  | Duration                              | By when                                   | Champion  | Status/Remarks                                   |
|---|---------------------------------------|---|---|--|
| 1.Write contracts to course instructors to complete work on integrating OERs  |                                       | December 2011                             | DP Academic (MUCE), QECTE<br>Coordinator            | MUCE: Done<br>DUCE: Seeking<br>funds<br>SoE?     |
| 2. Integrate OER into courses   | 2 months                              | January 2012                              | Course instructors                                  | Some work done:<br>mostly not OER<br>integration |
| 3 Training trainers to find, use and adapt/create OER and multi-media integration (as needed)   | 1 week<br>(residential –<br>vacation) | 1 <sup>st</sup> semester vacation<br>2012 | UDSM-MUCE-DUCE and SAIDE, Deans                     | Merged Workshop just completed                   |
| 4. Trainers train instructors to find, use and adapt/create OER and multi-media integration (as needed)   | 1 week                                | When trainers ready                       | UDSM-MUCE-DUCE and SAIDE, Deans                     |  |
| 5. MUCE, DUCE, SoE revisit work distribution to remove duplication: assign core responsibility for the first draft of each course to 1 of the 3 players; the other 2 will then provide feedback suggesting additions and changes. | 0.5 days by email                     | 16/03/2012                                | UDSM-MUCE-DUCE and, Deans                           |  |
| 6. On basis of WS, instructors prepare/update a course plan similar to that attached below.   | 0.25 days                             | 20/03/2012                                | Course instructors                                  |  |
| 7. Instructors populate each unit of study with at least one resource and activity with preference for use of OER and adaptation for context; then invite comment / suggestions from 2 other roleplayers                          | 2 days                                | 30/03/2012                                | Course instructors                                  |  |
| 8. Instructors prepare 2 <sup>nd</sup> draft modules  | 2 days                                | 06/04/2012                                | Course instructors                                  |  |
| 9. Editorial and QA work – content, pedagogy  | 1 week                                | 13/04/2012 content<br>+ pedagogy          | Internal and external reviewers in subject clusters |  |

|  | <u> </u>       | 1                                  | T                       |
|--|----------------|------------------------------------|-------------------------|
|  |                |                                    |                         |
| 10.Instructors prepare 3 <sup>rd</sup> draft pilot modules | 2 days         | 20/04/2012                         | Course instructors      |
| 11. Have sample populations of students work               | 1 week         | 27/04/2012                         | Students                |
| through the pilot courses and provide feedback             |                |                                    |                         |
| 12.Revision of pilot courses based on feedback             |                | April/May 2012+                    | Course instructors      |
| 13.Copy and language editing                               |                | May 2012+                          | Reviewers               |
| 14.Complete courses in language and science                | 1 month        | June 2012                          | UDSM-MUCE-DUCE and      |
| education pilot courses and others                         |                |                                    | SAIDE, Deans            |
| 15. 1-2 representatives able to talk about and             | 5 days         | June 2012                          | UDSM-MUCE-DUCE and      |
| provide examples of OER integration attend                 |                |                                    | SAIDE, Deans            |
| conference and pre-workshop in Ghana                       |                |                                    |                         |
| 16.Approval of courses by University participatory         |                | July-August 2012                   | HoDs, Deans             |
| organs   |                |                                    |                         |
| 16.1 Agree on licence and citation                         |                |                                    |                         |
| 16.2 Select final examples to share and insert             |                |                                    |                         |
| appropriate licence and citation                           |                |                                    |                         |
| 16.3 Upload to UDSM Moodle system                          |                |                                    |                         |
| 16.4 Provide copies to OER Africa/Saide to push            |                |                                    |                         |
| into global OER repositories                               |                |                                    |                         |
| 17.Production and reproduction of OER materials            |                | August-September 2012              | Deans, HoDs, Course     |
|  |                |                                    | instructors             |
| 18. Audit ICT infrastructure for implementation            | Before         | June 2012                          | Project management      |
|  | implementation |                                    |                         |
| 19. End-user training (UG students)                        |                | October- November 2012             | Deans, HoDs, Course     |
|  |                |                                    | instructors             |
| 20. Implementation and monitoring of pilot courses         | 3 months       | 1 <sup>st</sup> semester 2012-2013 | UDSM-MUCE-DUCE and      |
|  |                |                                    | SAIDE, Deans and others |
| 21. OER oriented curriculum                                | 6 months       | May 2013                           | UDSM-MUCE-DUCE and      |
|  |                |                                    | SAIDE, Deans and others |
| 22. Develop OER materials for all courses?                 | 1 month        | August 2013                        | UDSM-MUCE-DUCE and      |
|  |                |                                    | SAIDE, Deans and others |
| 23. Implement OER for all courses next academic year       |                | 2013-2014+                         | UDSM-MUCE-DUCE and      |

|  |  | SAIDE, Deans and others |            |
|--|--|-------------------------|------------|

| 15. Revision of pilot courses based on feedback                                       |                       | End August 2012+              | Module coordinators           |
| 16.Copy and language editing  |                       | September 2012+               | Reviewers                     |
| 17.Approval of new courses by University participatory organs                         |                       | October 2012                  | HoDs, Deans, Management       |
| 17.1 Agree on licence and citation  |                       |                               |                               |
| 17.2 Select final examples to share and insert  |                       |                               |                               |
| appropriate licence and citation  |                       |                               |                               |
| 17.3 Upload to Chalimbana Moodle system   |                       |                               |                               |
| 17.4 Provide copies to OER Africa/Saide to push                                       |                       |                               |                               |
| into global OER repositories  |                       |                               |                               |
| 18. Audit ICT infrastructure for implementation                                       | Before implementation | August-September 2012         | Project management            |
| 19. End-user training (UG students)   |                       | October- November 2012        | Deans, HoDs, Programme        |
|   |                       |                               | Managers, Module              |
|   |                       |                               | Coordinators                  |
| 20. Implementation and monitoring of pilot courses                                    | 3 months              | 1 <sup>st</sup> semester 2013 | Relevant staff                |
| 21. OER oriented curriculum   | 6 months              | June 2013                     | Relevant staff and structures |
| 22. Develop OER materials for all courses?  | 1 month               | August 2013                   | Relevant staff and structures |
| 23. Implement OER for all courses next academic year                                  |                       | 2014+                         | Relevant staff and structures |
| 24. Dissemination & sharing of experiences and conception of new cooperation projects |                       | Ongoing                       | Relevant staff and structures |

## Appendix 3: Draft way forward for Cambridge - Unisa collaboration

UNISA and the Centre for Commonwealth Education's oer4schools initiative at the University of Cambridge, with support from OER Africa, are exploring working together to integrate pedagogical expertise into the course redrafting process at UNISA that flows from its PQM renewal process 2012-2015.

It is envisaged that courses worked on together will focus on professional studies for teachers, incorporating:

- subject content and pedagogy,
- concrete general pedagogy, and subject pedagogy, focussing on creating a supportive environment for learning, which includes interactive teaching methods, Leadership for Learning, etc.
- application in teaching practice and classroom trialling,
- actual practical work / lab work for the classroom,
- ICT use in subject topic teaching,
- cross-curricular, project-based approaches to teaching, i.e. covering the subject through project work. (e.g. science taught in conjunction with maths, English, ...).

Proposals have so far been submitted for collaborative development of the following two programmes:

- ADE in Intermediate Phase (G4-6) Maths Education
- ADE in Intermediate Phase (G4-6) Science Education

and are currently under consideration by the relevant stakeholders.
